

Method Master in Job Traveler Format

REQUEST:

Our Epicor client wanted engineers to review job operations prior to creating the job. The format was to look like their Job Traveler so users would quickly identify the data and make any necessary changes prior to initiating production.

SOLUTION:

We needed access to the data prior to it actually turning into a job. Therefore, we used the Methods Master form and modified it to look like their Job Traveler:

METHODS MASTER LISTING		Page 1 of 63
INDENTED LEVEL		Part: 03925-858 Rev 3
		Description : Instrument Trim Package
Job: 15-3200
