

Custom Report Development

Do you have issues that cannot be resolved with your current reports?

Where do you begin?

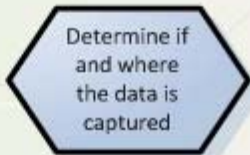

1.

How can I tell _____?
What's the best way to measure _____?

The answer can come from your data

2.

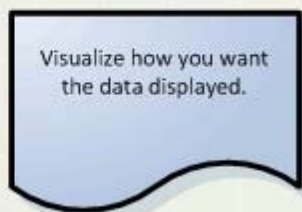

It is currently NOT being captured.
How can we capture the necessary data?
(we can help find a solution. Its probably a database application you already use.)

It is captured via the _____ software.

Whether its currently being captured or not, think about how to organize data for analytical purposes.

3.

Fields on the report
Filters and Selections
Sorting and Subtotalling

Our Report Request can help organize your thoughts

You are now ready to find answers to this issue.

4.
